

ORGANIC HOP PRODUCTS

PRODUCT OVERVIEW SHEET

ORGANIC HOP PRODUCTS

Yakima Chief Hops' Organic Hop Products are produced with strict adherence to both Washington State Department of Agriculture (WSDA) and U.S. Department of Agriculture (USDA) National Organic Program standards. Organic means produced without antibiotics, synthetic fertilizers, synthetic hormones, genetic engineering, sewage sludge, irradiation, artificially ingredients or preservatives. Overall, organic operations must also demonstrate that they are protecting natural resources and conserving biodiversity. Our partner farms work tirelessly adhering to USDA policies as well as imparting six generations of hop growing experience and knowledge to provide consistent organic hop varieties to meet the needs of brewers all over the world.

Yakima Chief Hops is working to expand access to organic hop products and enhance the opportunities for the entire organic hops supply chain. Organic growers include; Jackson Hop Farm, Perrault Farms and Roy Farms.

For more information on Yakima Chief Hops' organic hop products contact your sales rep or email organics@yakimachief.com.
