

Hemp-Leaf Kumiko Panel

Kumiko Starter Kit 55K5364

A great beginner project, this kit lets you explore kumiko, an ancient form of Japanese latticework traditionally used in shoji screens and sliding doors. The kit contains the basswood pieces you need to create a decorative 7 3/4" by 7 3/4" kumiko panel.

Visit the Discover section of our website to watch woodworker Andrew Strome demonstrate how to make this hemp-leaf kumiko panel.
