

# Soil Moist™

---

(XB312)

*The following instructions were provided by the manufacturer.*

Soil Moist is a product used as a delivery system to release water into all types of potting soil. It absorbs water, similar to a sponge; as the surrounding soil dries, the water is released to the soil.

Guaranteed Minimum Analysis: Crosslinked Polyacrylamide 90%

Registration Number 910016A Fertilizers Act.

## Directions for Use

### For Potting

1. Use the chart below. Premix the appropriate amount of Soil Moist with the potting soil.
2. After planting, water liberally for first few watering for polymer to absorb maximum amount of water.

Pot Size	Recommended Use Rate	
	Soil Moist Packets	Number of Holes
10cm (4")	1/2	4
15cm (6")	1/2	4
20cm (8")	1	6
25cm (10")	2	6
3.61 (1 Gal.)	3	8

### For Existing Pots

1. Gently make holes in the soil with a pencil or similar object. The general idea is to get near the plant's roots.  
Note: The holes should be far enough from the center of the plant, as to not damage the roots.
2. Add to the proper amount of Soil Moist from the chart, by putting equal amounts into the holes.
3. Cover the holes and water liberally.

### Caution

Must be used for domestic use, container-grown, non-food plants only. Spilled material is very slippery when wet.

1. Avoid contact with product, wear gloves to reduce exposure.
2. Wash with soap and water if skin contact occurs.
3. Seek medical attention if swallowed or irritation develops.
4. Use entire contents of packet when opened.
5. Do not use in potting soils with high water holding capacity.

*Contact factory for further information.*

**Keep out of reach of children.**
