

**RE: DB404 Barbecue Brush**

Dear Customer,

This barbecue brush is designed to scour cooked-on material from barbecue grills. Its lead-free brass bristles are resilient and resistant to shedding, but as with any wire-bristle barbecue brush, it is good practice to inspect the grill after cleaning to ensure that no stray bristles remain that could end up in your food.

Should you have any questions about this product, one of our Customer Service representatives would be happy to assist you.

Sincerely,

Lee Valley
