### Flammable Properties and Hazards:

#### Specific Hazards:

Flammable liquid and vapor.

Runoff to sewer may create fire or explosion hazard.

In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.

The vapor/gas is heavier than air and will spread along the ground.

Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back.

Decomposition products may include the following materials: carbon dioxide/carbon monoxide.

### Hazardous Combustion Products:

No data available.

## 6. Accidental Release Measures

### Protective Precautions, Protective Equipment and Emergency Procedures:

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak.

Wear appropriate protective equipment and clothing during clean-up. For personal protection, see section 8 of the SDS.

Ventilate closed spaces before entering them.

Avoid breathing mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

Local authorities should be advised if significant spillages cannot be contained.

Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area).

### Environmental Precautions:

#### Environmental Statement:

Avoid release to the environment.

Do not allow the product to enter waterways, sewers, or soil.

If there is a spill, contain it and clean up immediately.

Waste must be disposed of in accordance with federal, state, and local environmental regulations. Consult your local waste disposal authority for guidance.

### Steps To Be Taken In Case Material Is Released Or Spilled:

#### Spills/Leaks:

Do not attempt to act without suitable protective equipment. For further information, refer to section 8.

Dike far ahead to contain the spillage. Cap or cover all drains.

Absorb spills with inert material, such as vermiculite, sand or dry earth, then place materials into a suitable container.

Waste must be disposed of in accordance with federal, state, and local environmental regulations. Consult your local waste disposal authority for guidance.

Avoid runoff into storm sewers and ditches which lead to waterways.

Do not allow entry to septic systems.

Provide adequate ventilation.

A vapor suppressing foam may be used to reduce vapors. Water spray may reduce vapor but may not prevent ignition in closed spaces. Use water spray to dilute spill to a non-flammable mixture.

Eliminate all ignition sources (no smoking, flares, or flames in immediate area.)

Use only non-sparking tools and equipment and take measures to avoid static discharge.

## 7. Handling and Storage

### Precautions To Be Taken in Handling:

#### HANDLING:

Wear Personal Protective Equipment when handling.

Avoid contact with eyes, nose, mouth, skin and clothing.

Wash skin thoroughly with soap and water, after handling and before eating, drinking or smoking.
