

Using The Farm 24 Trellis System

This Trellis System will support your large plants, such as tomatoes and peppers, by guiding the plants upward as they grow. Once your plants reach a height where they would benefit from extra support, attach the **Trellis System** to the **Inner Metal Frame** of your AeroGarden Farm as pictured. The Trellis can be repositioned as plants grow.

How to Assemble the Trellis System

Attach the magnetic hooks at the ends of the long Trellis Support cords to the **INNER SIDES** of your Farm Metal Frames.

Then, pinching the clips at the ends of the short Trellis Support cords, clip them to the long Trellis Support cords. They can be attached at any desired intervals, as your plants need them.
