

South Deuel Wind Energy Center

The **South Deuel Wind Energy Center** is a proposed **260-megawatt (MW)** wind power generation facility in **Deuel County, South Dakota**. Land-based wind energy is critical to meeting growing energy demand and strengthening local economies, while creating jobs, American energy independence, and delivering cost savings for consumers.

Commitment to Safe, Responsible Development

We believe in safe, responsible, community-focused project development. With every project, we are committed to:

- Incorporating the latest information to minimize risk to the natural environment
- Building long-term relationships with communities, landowners and local businesses
- Supporting and collaborating with local first responders to ensure emergency preparedness
- Providing extensive training and workforce development for employees

Anticipated Project Timeline

Invenergy is working to bring the operation timeline into 2029.

Project Highlights*

\$116 million+ in local economic investment via tax revenue, land costs and lease payments, and wages and benefits over project lifetime

260 MW of domestic, reliable, affordable energy can power more than **101,000 American homes**

Over **200** construction jobs, boosting local businesses

Up to **8 full-time** skilled, local full-time operations and maintenance jobs

Annual donations to organizations such as local fire departments, veterans' services, 4-H and schools
