

# Spinneret Wind Energy Center

The Spinneret Wind Energy Center is a proposed 2,000 megawatt (MW) wind power generation facility in Union County, New Mexico targeted to begin operating in 2032. Wind energy is clean, renewable power from one of the oldest known energy sources, and today it is one of the cheapest.

## Invested in Your Community

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community's health and safety.

## Project Timeline

## Project Highlights

More than **\$1.7 billion** invested in local tax revenue, landowner payments, and wages and benefits over the life of the project

**2,000 MW** is enough electricity to power more than **750,000 American homes**

**Over 2,000+ jobs** supported during construction

**Over 90 full-time** operations and maintenance staff

Emissions reductions equivalent to **1.1 billion trees planted**

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy's Miami Wind Energy Center, located in Gray, Hemphill, and Roberts Counties, Texas.

## A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$278 million annually in the home communities where its projects are located.

Invenergy has successfully developed nearly 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
