

States Edge Solar Energy Center

The **States Edge Solar Energy Center** is a proposed **1,400-megawatt (MW)** solar power generation facility in **Dallam & Sherman Counties, Texas**. Solar energy is critical to meeting growing energy demand and strengthening local economies, while creating jobs, American energy independence, and delivering cost savings for consumers.

Commitment to Safe, Responsible Development

We believe in safe, responsible, community-focused project development. With every project, we are committed to:

- Incorporating the latest information to minimize risk to the natural environment
- Building long-term relationships with communities, landowners and local businesses
- Supporting and collaborating with local first responders to ensure emergency preparedness
- Providing extensive training and workforce development for employees

Anticipated Project Timeline

Project Highlights*

Thousands of dollars in annual donations to organizations such as local fire departments, veterans' services, food banks and schools

Hundreds of construction jobs, boosting local businesses

\$240 million in land lease payments, offering additional revenue for landowners over project lifetime

1,400 MW of domestic, reliable, affordable energy can power more than **260,000 American homes**

Provides additional revenue that helps preserve family farms for generations to come
