

# Towner West Wind Energy Project

The Towner West Wind Energy Project is a proposed 500+ megawatt (MW) wind power generation facility in Kiowa County, Colorado targeted to begin operating by the end of 2029. Wind technology delivers clean, reliable, and affordable power from one of the oldest known energy sources and today is helping to strengthen America's grid to meet increasing demand.

## Invested in Your Community

Energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community's health and safety.

## Anticipated Project Timeline

## Project Highlights

Over **\$120 million** invested in local tax revenue, land costs and lease payments, and wages over the life of the project

**500+ MW** is enough electricity to power more than **195,000 American homes**

Up to **350 jobs** supported during construction

Approximately **15 full-time** operations and maintenance staff

Protects farmland and provides additional revenue for generations to come

Committed to responsible, end-of-life recycling solutions for up to 90% of wind turbine components when possible

Invenergy's Spring Canyon Energy Center, located in Logan County, Colorado.

## A Proven Track Record in Energy Development

Invenergy is the largest privately held developer, owner, and operator of clean energy solutions.

A U.S.-based company, Invenergy invests over \$500 million annually in the home communities where its projects are located.

Invenergy has successfully developed more than 210 projects, including solar, wind, transmission infrastructure, natural gas power generation and advanced energy storage projects.
