## Stonemark Wind **Energy Center**

The Stonemark Wind Energy Center is a proposed 150-megawatt (MW) wind power generation facility in Marathon County, Wisconsin targeted to begin operating in 2029. Wind energy is clean, renewable power from one of the oldest known energy sources, and today is one of the most affordable ways to modernize America's energy grid.

## **Invested in Your Community**

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community's health and safety.

## **Project Timeline**

2022 - 2026

Development

Activities include permitting, environmental studies, interconnection studies, etc.

Construction

2029

2027 - 2028

Operation

More than \$72 million invested in local tax revenue, land costs and lease payments, and wages and benefits over the life of the project

**150 MW** is enough electricity to power more than 39,000 American homes

Up to 200 jobs supported during construction

Up to 6 full-time operations and maintenance staff

Emissions reductions equivalent to 81 million trees planted

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy's Forward Wind Energy Center, located in Brownsville, Wisconsin,

## A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$400 million annually in the home communities where its projects are located. Invenergy has successfully developed more than 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
