

# Plymouth II Wind Energy Center

The Plymouth II Wind Energy Center is a proposed 200 megawatt (MW) wind power generation facility in Plymouth and Cherokee Counties, Iowa targeted to begin operating in 2028. Wind technology delivers clean, reliable, and affordable power from one of the oldest known energy sources and today is helping to strengthen America's grid to meet increasing demand.

“

Clean energy projects are a real blessing for us. I never had a 401k. I farmed and stuck everything back into the farm. This is the 401k that I never had.”

**Dave Johnson**

Farmer & Invenergy Landowner  
Howard County, IA

## Project Timeline

2020 – 2026

**Development**

Activities include permitting, environmental studies, interconnection studies, etc.

2027 – 2028

**Construction**

2028

**Operation**

## Project Highlights

More than **\$204 million** invested in local tax revenue, land costs and lease payments over the life of the project

**200 MW** is enough electricity to power more than **75,000 American homes**

Up to **250 jobs** supported during construction

Up to **10 full-time** operations and maintenance staff

Draws on Invenergy's 15+ years of experience in Iowa across dozens of counties

Supports local education, emergency & veteran services

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy's Miami Wind Energy Center, located in Gray, Hemphill, and Roberts Counties, Texas.

## A Proven Track Record in Energy Development

Invenergy is the largest privately held developer, owner, and operator of clean energy solutions.

A U.S.-based company, Invenergy invests over \$500 million annually in the home communities where its projects are located.

Invenergy has successfully developed more than 210 projects, including solar, wind, transmission infrastructure, natural gas power generation and advanced energy storage projects.
