

Sinnissippi Solar Energy Center

The **Sinnissippi Solar Energy Center** is a proposed **100-megawatt (MW)** solar power generation facility in **Jefferson County, Wisconsin**. Solar energy is critical to meeting growing energy demand and strengthening local economies, while creating jobs, American energy independence, and delivering cost savings for consumers.

Commitment to Safe, Responsible Development

We believe in safe, responsible, community-focused project development. With every project, we are committed to:

- Incorporating the latest information to minimize risk to the natural environment
- Building long-term relationships with communities, landowners and local businesses
- Supporting and collaborating with local first responders to ensure emergency preparedness
- Providing extensive training and workforce development for employees

Anticipated Project Timeline

Project Highlights*

\$91 million+ in local economic investment via tax revenue, land costs and lease payments over project lifetime

\$500,000 in annual local tax revenue via Wisconsin Shared Utility Aid fund, distributed between host townships and Jefferson County

100 MW of domestic, reliable, affordable energy can power more than **19,000 American homes**

Up to 200 construction jobs, boosting local businesses

Up to **6** skilled, local full-time operations and maintenance jobs

Supports organizations such as Watertown Moose Lodge, Jefferson Food Pantry, and Ixonia, Johnson Creek, and Watertown fire departments
