

Downstream Solar Energy Center

The Downstream Solar Energy Center is a proposed 300 megawatt (MW) solar power generation facility in Lonoke and Pulaski Counties, Arkansas targeted to begin construction in 2026 and operations in 2028. Solar technology uses the power of the sun to deliver clean, reliable energy and is one of the lowest-cost energy sources available.

Local Community Impact

Invenergy is excited to be a long-term community partner to the Lonoke and Pulaski County communities, including the City of Keo! In 2025, Invenergy has announced a community benefits agreement with the City to invest in a brand new 'Keo Commons' facility, as well as a multi-year partnership with the Keo Collective. Pictured below is an Invenergy representative with Mayor Stephanie White at the Keo Pecan Festival, which Invenergy has sponsored since 2022.

Project Highlights

More than **\$250 million** invested in local tax revenue, land costs and lease payments, and project-generated wages and benefits over the life of the project

300 MW is enough electricity to power more than **66,000 American homes**

Up to **300 jobs** supported during construction

Up to **3 full-time** operations and maintenance staff

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy's 100th project, Southern Oak Solar Energy Center, located in Mitchell County, Georgia.

A Proven Track Record in Sustainable Energy Development

Invenergy is the largest privately held developer, owner, and operator of clean energy solutions.

A U.S.-based company, Invenergy invests over \$500 million annually in the home communities where its projects are located.

Invenergy has successfully developed more than 210 projects, including solar, wind, transmission infrastructure, natural gas power generation and advanced energy storage projects.
