

Badger Hollow Wind Energy Center

The **Badger Hollow Wind Energy Center** is a **110-megawatt (MW)** wind power generation facility in **Iowa and Grant Counties, Wisconsin**. Land-based wind energy is critical to meeting growing energy demand and strengthening local economies, while creating jobs, American energy independence, and delivering cost savings for consumers.

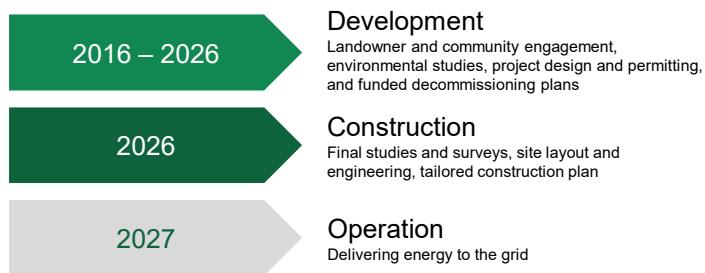

“

This [project] will pay car payments, college tuition payments and home mortgages for children, grandchildren and great grandchildren for a number of years to come, because there's a revenue stream that connects it back to the farm and the family.
