

Syllable Outbound for Flu

With COVID-19 cases on the rise across the United States, it is more critical than ever that health systems protect their most vulnerable populations against the flu.

Syllable Outbound enables health systems to deploy automated outreach campaigns that facilitate appointment scheduling and engage patients in their health journey, all while saving time for patients and staff.

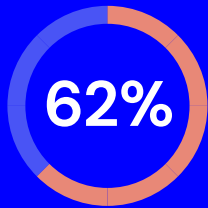

Our **solution** helps ensure your patients are protected with proactive outreach about the flu vaccine this season.

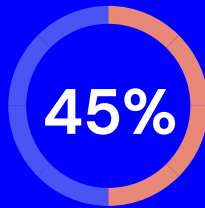

- ✓ **Fully customizable**
Customize workflows and messaging, with an optional integration with your CRM
- ✓ **Rapid deployment**
Initiate outreach campaigns in less than two weeks
- ✓ **Omnichannel outreach**
Utilize text messaging and robocalling to optimize reach
- ✓ **CRM Integration**
Capture patient information from outbound campaigns in Salesforce
- ✓ **No upfront costs**
Pay for utilization and performance

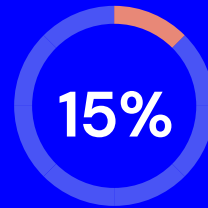

Syllable Outreach has successfully helped major health systems proactively engage their patients and schedule 10,000 appointments in just one week
