

Integration Guide: Capture Client Integration Guide for SecurityCoach

October 2022

This document describes how SonicWall® Capture Client is integrated with SecurityCoach. Once you set up this integration, data provided by SonicWall will be available under the SecurityCoach tab of your KMSAT console. This data can be viewed in SecurityCoach reports and used to create detection rules for real-time coaching campaigns.

Topics:

- [About Security Awareness and Security Coaching](#)
- [Creating a SonicWall Capture Client Admin Account](#)
- [Configuring the Integration Between SonicWall Capture Client and KnowBe4 Security Coach](#)

About KnowBe4 SecurityCoach

SecurityCoach is the first real-time security coaching product created to help IT and Security Operations teams further protect your organization's largest attack surface — your employees. SecurityCoach is natively integrated with KnowBe4's new-school security awareness training platform. SecurityCoach integrates with your existing SonicWall Capture Client to deliver real-time coaching in response to risky end-user security behavior.

Creating a SonicWall Capture Client Admin Account

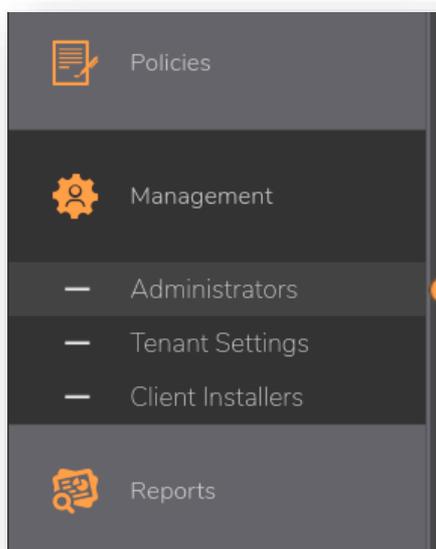

Before you can set up the integration in your KMSAT console, you will need to create a SonicWall Capture Client admin account. To create your admin account, follow the steps below:

- ① **If your organization already has a SonicWall Capture Client admin account, you can skip the steps in this section and follow the steps in the [Set Up the Integration in Your KMSAT Console](#) section of this article.**

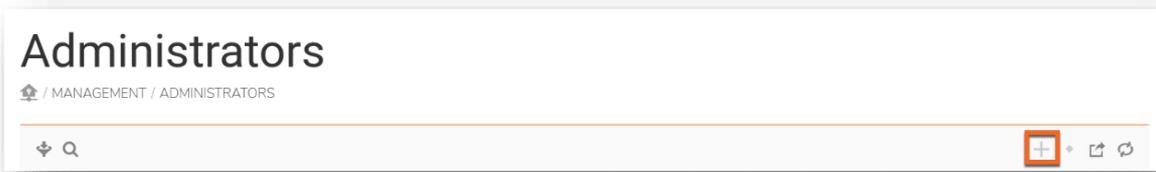

1. From your browser, navigate to your SonicWall Capture Client console and click Login with MySonicWall.

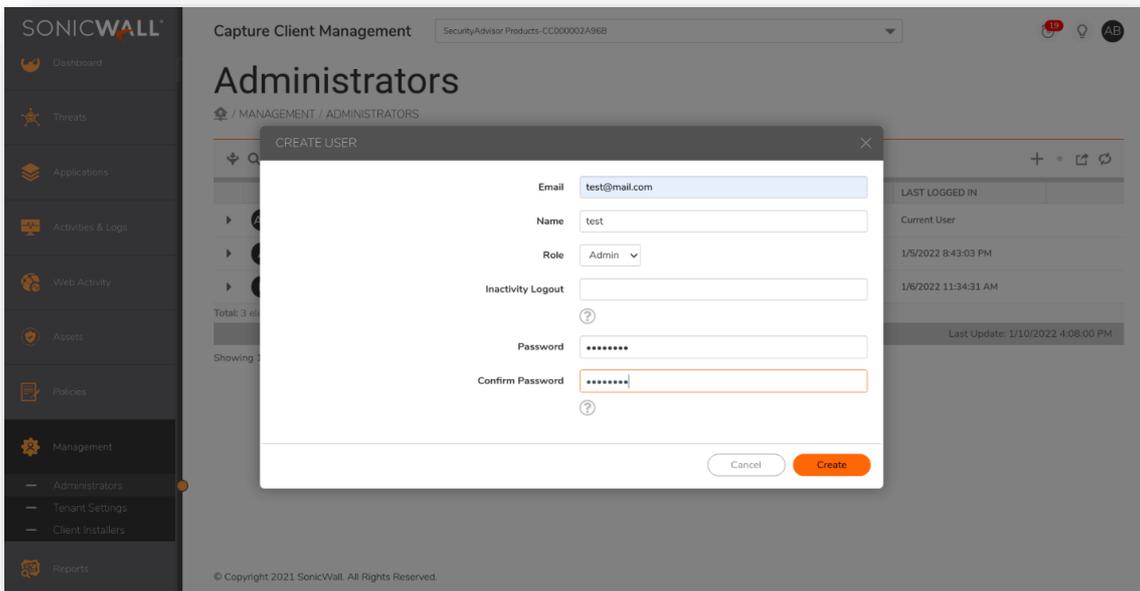

2. Navigate to Management > Administrators.

3. Click the + sign on the right to open the Administrators window.

4. Enter the desired email, name, and password for your new admin account. Then click Create.

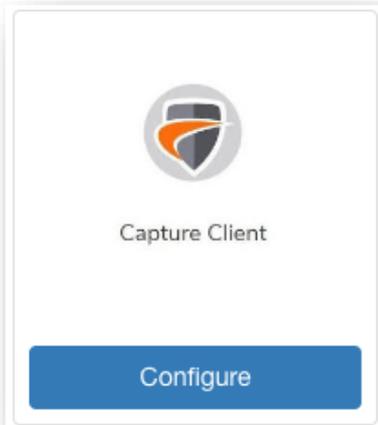

Configuring the Integration Between SonicWall Capture Client and KnowBe4 Security Coach

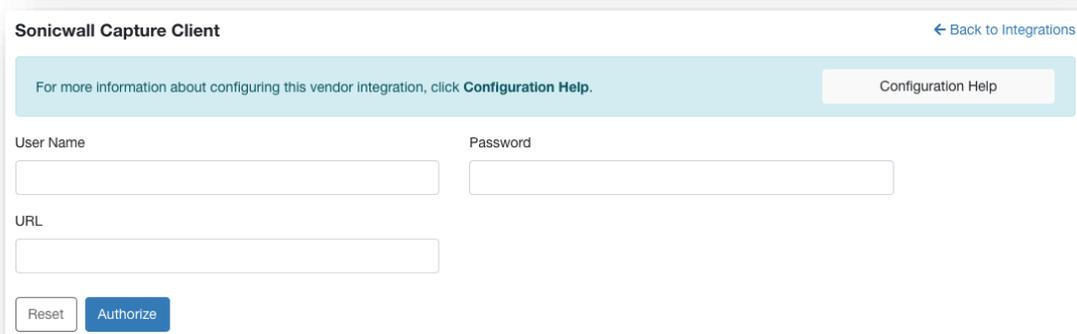

Once you've created your SonicWall Capture Client admin account, you can set up the integration in your KMSAT console. To set up the integration in your KMSAT console, follow the steps below:

1. Log in to your KMSAT console and navigate to SecurityCoach > Setup.
2. In the Available Integrations section, locate the SonicWall Capture Client card.

3. At the bottom of the card, click Configure.

4. In the User Name field, enter the email address from the admin account you created in the [Create a SonicWall Capture Client Admin Account](#) section of this article.
5. In the Password field, enter the password from the admin account you created in the [Create a SonicWall Capture Client Admin Account](#) section of this article.
6. In the URL field, enter your SonicWall Capture Client console URL. Your SonicWall Capture Client console URL will be similar to “https://captureclient-01.sonicwall.com”.
7. Click Authorize.
