

# Web Performance Monitor

Quickly troubleshoot performance issues for internal websites, customer-facing websites, and web-based applications.

Download a free product trial and start monitoring your websites in minutes.

**SolarWinds® Web Performance Monitor** tracks user experience and tests transactions for internal and external websites and web-based applications—from any location. Quickly identify slow or failing elements, then troubleshoot down to the supporting infrastructure, from web server and database to storage hardware.

## WEB PERFORMANCE MONITOR AT A GLANCE

- Know when users can't get to your site or web app or are giving up because it's too slow
- Track web service/SaaS application performance for both internal and external solutions
- View website and infrastructure performance from a single view
- Monitor user experience from multiple access locations
- Automatically alert with configurable thresholds at each step of a transaction

## FEATURES

### Monitor Internal, SaaS-Based, and Customer-Facing Web Apps

Easily monitor web applications such as CRM, supply chain, help desk, and more. Because Web Performance Monitor is installed within your firewall, you can safely monitor internal resources.

### Easy-to-Use Transaction Recorder

Quickly and easily capture how users interact with your site or web app with our intuitive recorder—no scripting involved.

## DATASHEET: WEB PERFORMANCE MONITOR

### Application Stack Management Dashboard

When used with products like SolarWinds Server & Application Monitor, you can map the relationship between a transaction or page to its supporting servers, databases, virtual infrastructure, and storage resources. This allows you to see the underlying components and their status.

### Web-Based Application Performance

With SolarWinds website monitoring software, you can quickly recognize if web services are causing a slow user experience in your third-party applications.

### Detailed Load-Time Metrics

TCP waterfall charts quickly identify what page elements take the most time to load. You can monitor website elements such as HTML, CSS, and JavaScript and overall performance and get notified for incomplete or slow transactions.

### Monitor Transactions From Multiple Locations

Web Performance Monitor lets you monitor transactions wherever you want, including locations within your firewall or your Amazon EC2 instances.

### Transaction Alerting/Notifications

Set warnings and custom timing thresholds for individual steps and entire transactions. Get notified automatically when a transaction fails.

### Website and Web App Performance Reporting

Web-based reports make it easy to generate quick reports on page load speeds, transaction health, and website availability over time.

## SYSTEMS REQUIREMENTS

SolarWinds® Platform products can be deployed on physical or virtual servers on-premises or in the cloud. These products can also be deployed via Azure or AWS marketplaces. For detailed system requirements, visit [support.solarwinds.com](https://support.solarwinds.com).

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.

SolarWinds modules installed on software versions 2022.x or later are implemented on the SolarWinds Platform. SolarWinds software modules implemented on versions 2020.6.x and earlier were implemented on the SolarWinds Orion® Platform. For more details see the WPM [release notes here](#).

## TRY BEFORE YOU BUY. DOWNLOAD A FREE TRIAL.

Don't just take our word for it. At SolarWinds, we believe you should try our software before you buy. That's why we offer free trials delivering full product functionality. Products can be downloaded from the SolarWinds website and run on-premises in IaaS environments or deployed in Microsoft® Azure® by the [Azure Marketplace](#).

## ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of simple, powerful, and secure IT management software built to enable customers to accelerate their digital transformation. Our solutions provide organizations worldwide—regardless of type, size, or complexity—with a comprehensive and unified view of today's modern, distributed, and hybrid network environments. We continuously engage with technology professionals—IT service and operations professionals, DevOps and SecOps professionals, and database administrators (DBAs)—to understand the challenges they face in maintaining high-performing and highly available IT infrastructures, applications, and environments. The insights we gain from them, in places like our THWACK® community, allow us to address customers' needs now, and in the future. Our focus on the user and our commitment to excellence in end-to-end hybrid IT management have established SolarWinds as a worldwide leader in solutions for observability, IT service management, application performance, and database management. Learn more today at [www.solarwinds.com](http://www.solarwinds.com).
