

# SolarWinds® Access Rights Auditor

Quickly assess security risks based on user permissions

Access Rights Auditor is a standalone free tool built to scan and evaluate possible security risks due to user access rights in your file system. Start a quick or deep scan of your Active Directory and file server folders and explore the resulting risk dashboard on several areas of your environment.

## FEATURES

### No installation required

Simply run the free tool from your desktop.

### File Server scan

Scan any File Server (FS) and/or Network Area Storage Server (NAS) folders exposing their shares via the CIFS protocol in the network.

### Quick or Deep scan

Select either a fast overview scan or a more in-depth review of the permissions in the selected folder structure.

### Risk overview dashboard

Examine the scan results for Active Directory and file servers on a dashboard with visual indicators for each risk category across the entire scanned environment.

## Scan results

See results by privileges set for each scanned folder, including sharing and NTFS permissions. View direct permissions given to users and groups. Each category shows samples of specific results.

## Export to PDF

Easily generate a printable PDF report of the scan results.

## Scan history

View results of one previous scan.

## SYSTEM REQUIREMENTS

HARDWARE	MINIMUM REQUIREMENTS
CPU	Single core 2.0GHz
Memory	4096MB
Hard Drive	>256MB Free
SOFTWARE	MINIMUM REQUIREMENTS
OS	Windows® 10, Server 2012R2, Server 2016
Framework	.Net Framework 4.7.1

## Other requirements and limitations

The system on which Access Rights Auditor is installed needs to be part of the scanned AD domain. The user needs to have rights to read the AD structure.

The scan size and depth are limited by the memory of the machine where the free tool is installed. More than the minimum required memory is needed to scan a large AD domain.

## ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of powerful and affordable IT infrastructure management software. Our products give organizations worldwide, regardless of type, size, or IT infrastructure complexity, the power to monitor and manage the performance of their IT environments, whether on-prem, in the cloud, or in hybrid models. We continuously engage with all types of technology professionals—IT operations professionals, DevOps professionals, and managed service providers (MSPs)—to understand the challenges they face maintaining high-performing and highly available IT infrastructures. The insights we gain from engaging with them, in places like our **THWACK** online community, allow us to build products that solve well-understood IT management challenges in ways that technology professionals want them solved. This focus on the user and commitment to excellence in end-to-end hybrid IT performance management has established SolarWinds as a worldwide leader in network management software and MSP solutions.
