

NPM Netpath Horizontal Privilege Escalation Vulnerability (CVE-2021-35225)

Summary

Each authenticated Orion user in the MSP (Managed Service Provider) environment can view and browse all NetPath Services from all MSP's customers. This can lead to any user having a limited insight into other customers' infrastructure and potential data cross-contamination.

Affected Products

- Network Performance Monitor 2020.2.6 HF1 and earlier

Fixed Software Release

- [Network Performance Monitor 2020.2.6 HF2](#)

Acknowledgments

- Preston Deason
- Chad Larsen
- Zachary Riezenman
