

SolarWinds<sup>®</sup> Certified Professional (SCP) Study Guide

# Architecture and Design

# How to Use This Study Guide

This study guide includes topics found on the SolarWinds Certified Professional (SCP) Architecture and Design exam. Use the available SolarWinds documentation to search and learn more about each category.

The intention of the topics in this guide is to supplement your years of experience and hands-on training with SolarWinds products.

This guide is not all-inclusive and should only be used as a starting place for your SCP studies.

If you have a SolarWinds product under active maintenance, you have access to virtual and on-demand training.

**To access SolarWinds Academy classes, follow these steps:**

1. Log in to your Customer Portal account at <https://customerportal.solarwinds.com>
2. Click Education and Training > Virtual Classrooms
3. Browse the available classes and select an option:
  - Click Register Now for a live class
  - Click the on-demand link to access a recorded course video

SolarWinds Academy adds available classes to the [Virtual Classrooms calendar](#) every month.

- **Note:** SolarWinds Academy classes are additional study resources and aren't explicitly designed for the SCP exam.

For additional study resources, visit the [THWACK®](#) community.

## ARCHITECTURE AND DESIGN EXAM CONTENT OUTLINE

### 1.1 **Analyze the interaction between the SolarWinds Platform (self-hosted), SolarWinds Observability Self-Hosted, and plug-in products.**

*(Questions related to these tasks make up 25% of the exam.)*

- 1.1.1 Recall the functions of the SolarWinds Platform (self-hosted) (i.e., Internet Information Services, Discovery, Mapping, Alerting, Reporting, etc.).
- 1.1.2 Identify the necessary elements in a SolarWinds Platform (self-hosted) deployment (i.e., application server, Primary SolarWinds Observability Self-Hosted database, Flow database, etc.).
- 1.1.3 Recall the stand-alone products that integrate with the SolarWinds Platform (self-hosted) through plug-ins.
- 1.1.4 Correlate the services that run on the SolarWinds Platform (self-hosted) server and the importance of each.
- 1.1.5 Analyze the port requirements needed by the SolarWinds Platform (self-hosted) and SolarWinds Observability Self-Hosted.
- 1.1.6 Determine an appropriate polling method based on set criteria (i.e., on prem, cloud, and hybrid environments).

### 1.2 **Design a SolarWinds monitoring environment following Centralized or Distributed deployment methodologies using a specific product.**

*(Questions related to these tasks make up 27% of the exam.)*

- 1.2.1 Remote Collector
- 1.2.2 Additional Polling Engine
- 1.2.3 Additional Web Server
- 1.2.4 Enterprise Operations Console
- 1.2.5 SolarWinds High Availability

### 1.3 **Determine how much a single poller can handle.**

*(Questions related to these tasks make up 23% of the exam.)*

- 1.3.1 Determine situations where the number of elements will work at default polling intervals.
- 1.3.2 Understand what will happen if the number of elements for a single poller are exceeded.
- 1.3.3 Analyze situations where a single web server may not be sufficient to handle concurrent users.

### 1.4 **Best practices and performance tuning in SolarWinds Platform (self-hosted) deployment.**

*(Questions related to this task make up 17% of the exam.)*

- 1.4.1 Factors that affect the SolarWinds Platform's (self-hosted) performance.

### 1.5 **Employ integration with SolarWinds Platform (self-hosted).**

*(Questions related to this task make up 8% of the exam.)*

- 1.5.1 Determine the steps in integrating the SolarWinds Platform (self-hosted) with other products.

## ARCHITECTURE AND DESIGN EXAM RESOURCES

| TASK  | ITEM RESOURCES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
