

# Weave GitOps for EKS Blueprints

---

## Building on EKS Blueprints Quickstart: Declarative application delivery and EKS best practices

### ► Challenges

Building and operating a well architected Kubernetes environment can be a daunting task as more teams across your organization use EKS to develop and operate workloads.

Ensuring all underlying infrastructure resources are following best practices, enabling platform and operations teams to onboard and operate new applications consistently and efficiently while providing developers with autonomy and ready access to shared services becomes a critical requirement.

### ► The Weaveworks Solution

As pioneers in the GitOps space, Weaveworks has partnered with AWS to deliver a GitOps enabled EKS Blueprint solution. By using **Weave GitOps** with **EKS Blueprints** in either the CDK or Terraform versions, your organization will be able to build a fully declarative and continuously reconciled Kubernetes, multi-tenant platform following our GitOps Operating Model as well as AWS Well Architected best practices.

### ► Benefits

With Weave GitOps we enhance and support EKS Blueprints, your team will be able to deploy one or more well architected EKS environments, declare shared services to deliver consistently across clusters and onboard development teams securely. You will also reap the benefits of Weave GitOps such as centralized observability across all your clusters including dashboards and alerting, full cluster lifecycle management, and support with real time insights into your application deployment and reconciliation status.

### ► Key Reasons to engage with Weaveworks

- Customers who are interested in learning more and implementing GitOps
- Customers who are self managing Kubernetes today and would like to migrate to EKS
- Customers who are hitting scale issues with their current EKS configurations and need expert assistance migrating to a scalable shared services platform
- Large customers who are looking to architect a best in class shared services platform based on EKS

### ► Weave GitOps EKS Accelerator Products

All of the below offerings are available through the AWS Marketplace and can be purchased through your AWS account teams as well. Three package offerings, bronze, silver, and gold; all include dedicated Customer Reliability Engineer support, subscriptions for development and production support of Weave GitOps Enterprise which enhances and the use EKS Blueprints.

Package	Bronze	Silver	Gold
Production Nodes	20	20	25
Development Nodes	40	40	50
<b>EKS and Weave GitOps Enterprise</b>			
Bare-metal EKS	Y	Y	Y
GitOps for Clusters	Y	Y	Y
GitOps for Applications	Y	Y	Y
<b>Accelerated Engagement</b>			
Dedicated CRE	1	1	2
Engagement Length (months)	3	6	6
Design	Y	Y	Y
Build	Y	Y	Y
Secure	Y	Y	Y
Operate	Y	Y	Y
Application Onboarding		Y	Y
Multiple Application Teams		Y	Y
Multi-cluster Application Deployment		Y	Y
Advanced Policy			Y
Scaled Fleet Management			Y
<b>WGE Maintenance and Support</b>			
Weave GitOps Maintenance & Security	Y	Y	Y
Weave GitOps Upgrades	Y	Y	Y
Weave GitOps Production Support	Y	Y	Y
Dedicated Enhanced Support			Y
<b>Package Price</b>			
Package Term (months)	12	12	12
SKU	PA1EK122112	PA2EK122112	PA3EK122112
<b>Package Price</b>	<b>\$120,000</b>	<b>\$233,000</b>	<b>\$460,000</b>

Available on the AWS Marketplace
