Kubernetes QuickStart

Accelerate your journey to Kubernetes with GitOps

Excited about the opportunity of Cloud Native and GitOps but not sure how to navigate your organization to the path to success? Whether you're using Kubernetes in the cloud or behind the firewall your team needs battle-tested architectures, workflows and skills to operate Kubernetes reliably. Our QuickStart is a comprehensive package to design, build and operate Kubernetes in production using the GitOps methodology.

The Weaveworks expert team engages with you across infrastructure, operations and application management to help you design and build a production ready application and reliable platform.

We start things off with a instructor lead GitOps training course, followed by an architecture discovery and design workshop for a green field production cluster. Your success is important to us and we include 5 days of follow on professional services (up to 6 months from the initial engagement).

Also included is a Weaveworks Kubernetes subscription for up to 10 nodes with global support for 1 year.

What's Included

Pricing	$50,000
Kubernetes Architecture Workshop	• Instructor lead workshop on Kubernetes and Gitops • Up to 15 students (3 days at customer site)
Production Ready Reference Architecture	• Collaborative review by Weaveworks and customer architects • Establish quick-start deployment leveraging Weaveworks Kubernetes and Gitops best practices
Weaveworks Kubernetes Subscriptions	• 10 subscription entitlements • 9/5 support • Dedicated slack channel • Security updates for the platform • Patch updates • Supported hotfix patches • Prometheus monitoring
Professional Services	• Follow on professional services (1 week) • Valid for 6 months after initial workshop and architecture review
SRE Add On Package	• Named Technical Account Manager providing single point of contact for Weaveworks • Quarterly review of ongoing deployment • Discounting on subscription of additional nodes

Additional training and support services are available, please contact sales@weave.works.
