

Environmental Policy

Ampol is committed to minimising any adverse impacts of our operations on the environment and our local communities, and adapting our business model to meet the changing needs of our customers. To achieve this Ampol intends to:

- **Promote environmental leadership**, responsibilities, and behaviours as an integral part of the duties of management.
- **Integrate environmental responsibilities and considerations** into business decision-making and planning processes.
- **Evaluate and manage risks** within our operations that have the potential to adversely affect the environment and our local communities.
- **Implement appropriate objectives, targets, plans, and controls** to mitigate any pollution, meet our operational decarbonisation targets and ambitions, conserve resources, increase operational energy efficiency, and minimise operational waste.
- **Develop, implement, and maintain systems, standards, and processes** that seek to manage operational environmental risk to a tolerable level.
- **Measure, report and govern** the progress of Ampol's environmental performance, to effectively prioritise risks and drive continuous improvement including evaluating progress against this policy and objectives and targets set.
- **Comply with applicable environmental laws and regulations** together with internal policies and standards.
- **Review Ampol's environmental management systems** regularly to verify compliance with applicable environmental legislation and this policy, and to determine whether these systems and associated processes maintain continued suitability, adequacy and effectiveness.
- **Communicate openly and engage** with key stakeholders on environmental issues.
- **Provide adequate resources, training, and tools** to enable relevant personnel to comply with this policy.
- **Actively monitor the development of environmental laws and regulations** relevant to our business to support informed decision-making, and participate in consultation where appropriate.
- **Be prepared for emergencies** so that the environmental outcome of any incident may be mitigated quickly and effectively to the extent possible.
- **Report and investigate environmental-related incidents** and implement actions to prevent recurrence in order to drive continuous improvement.
- **Understand the risks and opportunities that climate change presents** to our transport fuels business and play a role in the energy transition to a lower-carbon future.

All employees and contractors are accountable for Ampol's environmental performance and must comply with this policy.

Publication

This policy will be made available on the Ampol website (www.ampol.com.au).
