

The most trusted source for cybersecurity training, certifications, degrees, and research

## A Partnership for Accredited Educational Institutions

The SANS Institute & The Research and Education Networking Information Sharing and Analysis Center (REN-ISAC) Partnership Program

# Improving Your Security Posture

Cyberthreats appear as fast as a mouse click in today's environment. Your best defense is an educated workforce. Eligible organizations use this Partnership Program to allocate technical cybersecurity and security awareness training to their employees, helping them to:

- Gain access to superior training at highly discounted rates
- Curb budget constraints
- Make a clear impact on national security
- Mitigate institutional liability

### Special Offer:

For a limited time, save more than 50% when you purchase SANS technical and security awareness training through our partnership purchase window. Special discounts are available from Dec 1, 2020 – Jan 31, 2021. Make a positive impact on your cybersecurity protection. Get the training you need at an affordable cost.

A Smart Approach to Security Awareness and Training

# About the SANS/REN-ISAC Partnership

The Research and Education Networks Information Sharing and Analysis Center (REN-ISAC) and SANS Institute Partnership Program draws on a shared mission to ensure that InfoSec practitioners in critical organizations have the skills needed to protect national security and enhance cybersecurity readiness and response.

## SANS ONLINE TRAINING

SANS Online Technical Training offers the same content, instructors, and results as our live courses with the flexibility to learn in an online environment, allowing information security professionals to train whenever and wherever it's most convenient. Online courses feature hands-on labs and access to subject-matter experts to guide students through challenging concepts or questions. Save more than 50% when you purchase training credits during one of our partnership purchase windows. Online training credits may be redeemed for any course offered in our two most popular training formats: self-paced e-learning via OnDemand and livestream, interactive scheduled sessions via Live Online. Security professionals have their choice from more than 45 courses and certifications in disciplines that include:

- Cyber Defense
- Penetration Testing
- Incident Response & Threat Hunting
- Management
- Industrial Control Systems
- Application Security

## NETWARS

Participants in SANS NetWars Continuous online challenge are given four months to experiment with real-world scenarios, and test their hands-on skills in the following key areas:

- Vulnerability Assessments
- System Hardening
- Malware Analysis
- Digital Forensics
- Incident Response
- Packet Analysis
- Penetration Testing
- Intrusion Detection

## SANS SECURITY AWARENESS

Technical training is a critical component for adoption of core security awareness concepts. Compliance and behavior change becomes difficult for non-technical individuals without the proper content. SANS Security Awareness offers a comprehensive solution for end users and individuals of all levels with expert-authored content. Created by a trusted global network of cybersecurity professionals, this Partnership Program includes several key Security Awareness products:

- **End User** – Comprehensive security awareness training for all computer users based on the Critical Security Controls
- **Healthcare** – Computer-based security awareness training tailored to healthcare organizations
- **Developer** – Train your developers in secure coding techniques and how to recognize current threat vectors in web applications
- **Engineer** – Rigorous computer-based training for those interacting or operating with Industrial Control Systems
- **Phishing** – Test your employees through phishing simulations consistent with real-world attacks

## Partnership Program students speak up:

“We just purchased SANS Security Awareness, which I think is the best I have ever seen.

In addition, it's backed up by SANS extensive experience and knowledge base in InfoSec.”

— Karen McDowell, University of Virginia

“Well organized, great implementation and evaluation tips – lots of good takeaways.”

— Marcelle Lee,  
Anne Arundel Community College

“Very relevant to my work situation. [The instructor] breaks a complicated subject into very easily understood segments.”

— Marc Baker, State College of Florida

“Excellent content that can be leveraged immediately!”

— William Smith Jr., The Johns Hopkins University Applied Physics Laboratory

“Instructors add good value by providing interesting personal stories to content.”

— Travis Carrol of UCSC  
about SEC504: Hacker Techniques,  
Exploits, and Incident Handling
