

# SANS 2022 ATT&CK™ and D3FEND™ Report: Incorporating Frameworks into Your Analysis and Intelligence

Author: **Matt Bromiley**

Publication Date: **January 19th, 2022**

**Analyst Program** 

## OVERVIEW

For many years, organizations have relied on the MITRE ATT&CK framework as a valuable resource to catalog adversary tactics and techniques. The information security community has leveraged ATT&CK to help guide investigations, write robust detections, and enrich threat intelligence. In June 2021, a cooperation between the National Security Agency (NSA) and MITRE released D3FEND – a complementary framework that provides insight into defensive measures for enterprise defense.

### MEET THE AUTHOR

**Matt Bromiley**  
SANS Certified Instructor

Matt Bromiley is a principal incident response consultant at a top digital forensics and incident response (DFIR) firm, where he assists clients with incident response, digital forensics, and litigation support. He also serves as a GIAC Advisory Board member, a subject-matter expert for SANS Security Awareness, and a technical writer for the SANS Analyst Program. Matt brings his passion for digital forensics to the classroom as a SANS Instructor for FOR508: Advanced Incident Response, Threat Hunting and Digital Forensics, and FOR572: Advanced Network Forensics, where he focuses on providing students with implementable tools and concepts.

Topics will focus on:

- How to leverage D3FEND to enhance enterprise security defenses
- How to utilize ATT&CK and D3FEND together to detect and counter attacker tactics and techniques
- How to incorporate D3FEND countermeasures into your daily \*DR workflows
- How the security community can give back and make D3FEND even better

### SPONSOR

- Sponsors have the opportunity to share how their solutions can enable security teams to leverage D3FEND and enhance their enterprise defense.
- Cobrand the survey results whitepaper and webcast.
- Collaborate with SANS' best cybersecurity experts who are at the forefront of the ever-changing war on cybersecurity.
