FEATURED KEYNOTE

From Entertainment to Action: *Storytelling as Cyber Strategy*

Tuesday, March 4

LOCATION: **Holiday 6** (2ND LEVEL)

6:00–6:30 PM (RECEPTION) | **6:30–8:30 PM** (KEYNOTE)

SPEAKER: **Tony Sager, Senior VP & Chief Evangelist**

The art of storytelling has long been recognized as an essential tool for business leadership, including for cyber defense. Professional storytelling is much more than entertainment. A good story can turn complex topics into memories, dry facts into inspiration, and successes (and failures) into lessons. The right story can also create the goal that inspires people to come together in common action.

In this talk, Tony Sager will describe several stories developed during his career at the National Security Agency—and how they brought people and ideas together into a single theme that helped change missions, organizations, and the industry.

For example, Tony grew up in the NSA world of security testing for defense—Red Teams, Blue Teams, product vulnerability analysis, etc. Each project or task was a “one-off”—helpful to a customer or a project, but not really addressing root causes. “Security Sampling” was a story that helped people see their individual jobs as part of a larger whole, where each job is a “sample” of the environment that allows us to draw meaningful conclusions about the population from which we are sampling (the networks of the Defense Department).

He'll describe similar stories that led to national consensus on security benchmarks; an open framework of Cyber “Plumbing” and Security Automation; and the origin of the CIS Security Controls. With each story there's an idea, a lesson, and an outcome.

RECEPTION

SANS Community Night: Strengthening Connections in Cybersecurity

Wednesday, March 5 | 6:00–7:00 PM

LOCATION: **Holiday 6** (2ND LEVEL)

Join us for a special “Community Night” reception at SANS Security East 2025. This gathering is open to all cybersecurity professionals and designed to foster connections across the entire spectrum of our community—from newcomers to seasoned experts.

Celebrate the enduring spirit of learning and collaboration that defines the SANS community. Whether you are a new student, a long-time alum, or a cybersecurity professional passionate about the latest advancements, this evening offers an exceptional opportunity to network, share insights, and discuss the evolving challenges and solutions in cybersecurity.

Join SANS staff, faculty, and peers in the field for an inspiring night filled with bites, beverages, and connections. This is your chance to blend past experiences with new insights, building lasting relationships and strengthening our collective efforts in the cybersecurity landscape.
