The SLTT Government partnership program draws on SANS Institute’s mission to ensure InfoSec practitioners in critical organizations have the skills needed to protect networks, critical infrastructure, sensitive data, and enhance the cybersecurity readiness and response of state, provincial, local, tribal, and territorial government entities.

Through the SANS SLTT Government Partnership aggregate buy program, you can get the training you need at an affordable cost and improve your organization’s security posture against ransomware, phishing, and other cyber-attacks. The secret to this successful program is cost reduction realized by “aggregate” economies of scale.

This program offers both security awareness and online technical training courses to qualifying organizations at substantial cost savings, during special purchase windows.

### 2024 Purchase Windows

**WINTER PROGRAM:** December 1, 2023–January 31, 2024

**SUMMER PROGRAM:** June 1–July 31, 2024

### Exclusive Aggregate Buy Program Offerings

SANS products, training and services, including GIAC certification, cannot be resold without explicit and written approval from an official at SANS Institute.
Security Awareness training is a critical component of a comprehensive security program. Compliance and behavior change becomes difficult for non-technical individuals without the proper content. SANS Security Awareness offers a comprehensive solution for end users and individuals of all levels with expert-authored content. Created by a trusted global network of cyber security professionals, this Partnership Program includes several key Security Awareness products:

- **End User** – Comprehensive security awareness training for all computer users based on the Critical Security Controls
- **Phishing** – Test your employees through phishing simulations consistent with real world attacks
- **Developer** – Train your developers in secure coding techniques and how to recognize current threat vectors in web applications
- **CIP** – Relevant training addresses NERC CIP Reliability standards for the utility industry
- **IT Administrator** – Level up your technical staff with advanced training to protect your whole organization.
- **ICS** – Rigorous computer-based training for those interacting or operating with Industrial Control Systems

---

“I love your product. I implemented SANS Security Awareness at California Air Resources Board back in October 2012. I really enjoyed the program; I had 92% compliance with 1300 staff. Your product was an obvious choice for our organization here at Covered California.”

—Terese Matchim, ISO for California Health Benefit Exchange
Online Training from SANS Institute is a flexible and effective option for information security professionals of all experience levels to complete SANS’ top training from anywhere in the world. Two of SANS’ available Online Training formats are OnDemand and Live Online—each offering slightly different features so that students can choose the workflow, interaction, and speed of training they prefer.

**OnDemand**
SANS OnDemand courses provide the flexibility to train online wherever and whenever it’s most convenient for you. With four months of access to the online course materials, including lectures, quizzes, and labs, you can master the course content on your schedule, at your own pace.

**Live Online**
SANS Live Online features livestreamed, interactive training with SANS’ top instructors you can take from anywhere. Students can choose scheduled sessions offered across multiple global time zones from our full catalog of courses. Hands-on lab exercises and the ability to engage with your instructors and peers elevate the learning experience.

GIAC Certifications develops and administers premier, professional information security certifications. More than 35 practitioner cybersecurity certifications align with SANS training and ensure mastery in critical, specialized InfoSec domains. GIAC Certifications provide the highest and most rigorous assurance of cyber security knowledge and skill available to industry, government, and military clients across the world.

A GIAC Certification ensures master of real-world knowledge and skills.

- Tests on pragmatics rather than theory
- Certifications are valid for four years
- A renewal process that keeps you up to date on the latest industry trends
- Advanced Certification Options: Publishing a Gold Paper through GIAC and/or obtaining the GIAC Security Expert Certification

Top Four Reasons to Get GIAC Certified:

1. Promotes hands-on technical skills and improves knowledge retention
2. Provides credible proof of technical know-how
3. Creates opportunity for promotion and respect from peers
4. Demonstrates to hiring managers technical qualifications for career growth

What is NetWars Continuous?

SANS NetWars Continuous Online Range uses the gamification of IT security to advance your most vital InfoSec skills. To build your skills and keep them from getting rusty, you need an environment where you can apply your knowledge to solving real-world InfoSec issues to stay sharp. That’s what NetWars Continuous is all about. Over the course of four months, you can master real-world tactics and techniques in a safe learning environment.

NetWars Continuous – Always Available

- It allows participants an opportunity to advance their hands-on technical skills. Players learn the areas where they need to increase their proficiency so they may improve, come back, and continue the challenge.
- It gives participants four months of access to NetWars Continuous. At the end of the four months, participants will receive a written assessment of the skills which they demonstrated during NetWars.
- Participants may choose from one of two NetWars Continuous Versions: Core NetWars Continuous or DFIR NetWars Continuous to experiment with real-world scenarios and develop hands-on skills.

Core NetWars Continuous Topics
- PowerShell challenges
- Network traffic capture and analysis
- Penetration testing
- Common Management System vulnerability exploitation
- Threat detection through log analysis
- Windows and Linux privilege escalation
- Cryptographic security and exploitation
- Advanced malware analysis
- Intrusion detection
- Linux fundamentals

Windows exploitation
- Command Line Kung Fu
- Advanced database hacking
- Reverse engineering and debugging
- Binary exploitation
- Firewall fundamentals
- Fuzzing
- Social engineering
- WAF evasion
- Scanning/Enumeration

DFIR NetWars Continuous Topics
- Digital Forensics
- Incident Response
- Threat Hunting
- Malware Analysis
- Endpoint Forensics
- Network Forensics
- Memory Analysis

Pricing

$2,535 per user for a four-month period.
