Application to the programme

The assessment and selection for the programme is a three-stage process:

Application Form

You will complete a form which collects essential personal information as well as providing you with an opportunity to let us know why you would be an ideal candidate for this programme.

Aptitude Assessment

The SANS CyberTalent Enhanced Assessment has been developed to determine if an individual has the aptitude and basic skills to succeed in information security. The 50-item exam was developed by information security subject matter experts and predicts potential success on GIAC exams.

Offer of Programme Place

If you have been successful in your application, a place on the programme will be offered to you. Proof of identification will be sought at this stage, and a Student Agreement will be sent to you to read and sign. Joining instructions will then be sent to you.
