SANS SPONSORSHIP PROGRAM

SANS 2022 Moving to a State of Zero Trust

Author: Matt Bromiley Presentation Date: August 17th, 2022

Analyst Program 🔟

OVERVIEW

One of the fastest advantages adversaries gain when compromising a victim environment are weak or over-privileged credentials. Enterprise accounts that offer far too much access in an environment allow adversaries to easily move through an environment, compromise systems, and exfiltrate data. As organizations work to gain control over this issue, many are looking to implement a zero trust ecosystem to lock down account permissions.

MEET THE AUTHOR

<u>Matt Bromiley</u> SANS Certified Instructor

Matt Bromiley is a principal incident response consultant at a top digital forensics and incident response (DFIR) firm, where he assists clients with incident response, digital forensics, and litigation support. He also serves as a GIAC Advisory Board member, a subject-matter expert for SANS Security Awareness, and a technical writer for the SANS Analyst Program. Matt brings his passion for digital forensics to the classroom as a SANS Instructor for FOR508: Advanced Incident Response, Threat Hunting and Digital Forensics, and FOR572: Advanced Network Forensics, where he focuses on providing students with implementable tools and concepts. In this white paper, we will explore the concept of zero trust and what it means to security teams and your overall security posture. As a concept, zero trust is relatively straightforward: trust no one until verified, inside or outside the network. However, this is often easier said than done, especially for systems built on legacy authentication models. We will also examine what a zero trust implementation looks like, how this can stop adversaries dead in their tracks, and what your organization can do to begin moving towards a state of zero trust.

SPONSOR

- Sponsors of this highly sought out report can position themselves as a trusted solution provider for detecting and combatting today's threats.
- Cobrand the whitepaper and webcast.
- Collaborate with SANS' best cybersecurity experts who are at the forefront of the ever-changing war on cybersecurity.
