

ICS CONSEQUENCE-DRIVEN INCIDENT RESPONSE SOLUTIONS FORUM

Virtual Event | December 9, 2022

OVERVIEW

Consequences of modern cyber-attacks impacting control systems can range from large power grid blackouts to large cities or major regions, failure of critical manufacturing equipment with massive financial loss, paralyzing smart city infrastructure such as transportation in large municipalities, inflict serious environmental damage, or worse, cause injury or death to facility workers.

Establishing ICS-specific network visibility, threat detection based on evolving sector specific threat intelligence, and specific incident response for control networks - are all critical! They are all requirements of the first stages of maturity towards any effective ICS Security Defense Program.

The ICS Solutions Forum brings solution providers and security vendors together to present best practices and suggested actions for ICS incident response with a focus on ICS specific threat detection and rapid engineering system recovery. Sponsors have the unique opportunity to develop a compelling agenda and showcase their products and solutions to high level security practitioners and cybersecurity professionals. Speak directly to those who are on the front lines every day protecting their organization against the latest threats and showcase your tool's capabilities.

CHAIRPERSON

[Dean Parsons](#)
SANS Senior Instructor

Dean is the CEO and Principal Consultant of ICS Defense Force and brings over 20 years of technical and management experience to the classroom. He has worked in both Information Technology and Industrial Control System (ICS) Cyber Defense in critical infrastructure sectors such as telecommunications, and electricity generation, transmission, distribution, and oil & gas refineries, storage, and distribution. Dean is an ambassador for defending industrial systems and an advocate for the safety, reliability, and cyber protection of critical infrastructure. His mission as an instructor is to empower each of his students, and he earnestly preaches that "Defense is Do-able!"
