

SANS 2022 BLUE TEAM SUMMIT

Scottsdale, AZ | In-Person and Virtual

October 3: Expo Day 1 & Summit Bonus Sessions

October 4: Expo Day 2 & Summit Solutions Track

OVERVIEW

While attackers only need to find one or in some cases a few flaws to have impact, we need to fix or be prepared to respond to all flaws. We can't be afraid to collect data and scrutinize, critique, and refine our approach as iteration and continuous improvement are key. Root-cause analysis and honesty about what we can and what we cannot accomplish are essential, however, this alone will not lead to success. We need to be great communicators as well but in order to communicate effectively, we need data.

The Blue Team Summit brings solution providers and security vendors together to present best practices around network security monitoring and technologies available to better solutions and improve response. Featuring a devoted Solutions Track and Bonus Sessions, sponsors have the unique opportunity to develop a compelling agenda and showcase their products and solutions to high level security practitioners and cybersecurity professionals. Speak directly to those who are on the front lines every day protecting their organization against the latest threats and showcase your tool's capabilities.

CHAIRPERSON

David Hazar
SANS Certified Instructor

David is a security consultant focused on vulnerability management, application security, cloud security, and DevOps. David has 20+ years of broad, deep technical experience gained from a wide variety of IT functions held throughout his career, including: Developer, Server Admin, Network Admin, Domain Admin, Telephony Admin, Database Admin/Developer, Security Engineer, Risk Manager, and AppSec Engineer. David is a co-author and instructor for MGT516 and an instructor for and contributor to SEC540.
