2024 ICS/OT Survey

SURVEY RELEASE DATE: OCTOBER 9, 2024

SANS | Research Program

SURVEY AUTHOR:

Jason Christopher
Certified Instructor

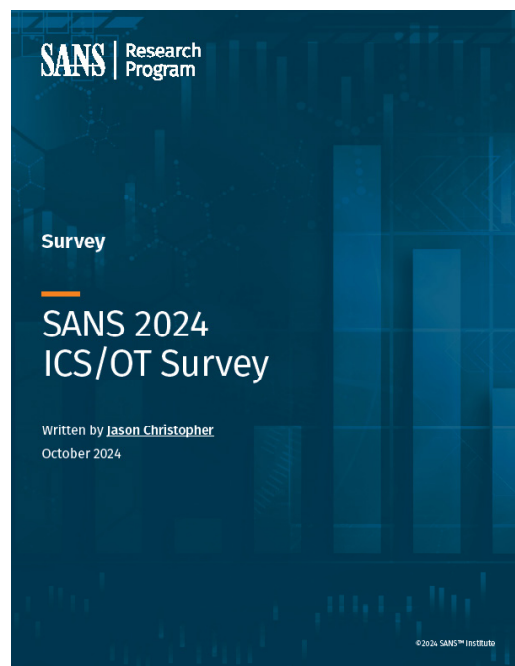

SURVEY OVERVIEW:

SANS 2024 ICS/OT Survey:
The State of ICS/OT Cybersecurity

Since 2017, the SANS ICS/OT Cybersecurity Survey has been a foundational benchmark for critical infrastructure asset owners and operators. Each year, SANS explores the growing trends in cyber threats, vulnerabilities, and risks across industrial environments, including actionable recommendations for how organizations can improve their security posture. As global incidents-- and regulations-- continue to focus on ICS/OT cybersecurity, it is vital that actionable information and benchmarks are provided to defenders working in this challenging field and we look forward to continuing our efforts in 2024.

This year's survey will provide invaluable insights across the global landscape of industrial security and foundational topics including:

- Incident responses in ICS/OT environments
- Creating and maintaining defensible ICS/OT security programs and architectures,
- Increased visibility and monitoring of ICS/OT networks
- Challenges with industrial remote access
- Risk-based vulnerability management
