Live Online 📚

Quickly Build In-Demand Cybersecurity Skills

SANS Stay Sharp Spring 2022 – Live Online (April 4–6, EDT) offers short courses designed to equip you with cybersecurity training you can implement immediately. Whether you are new to the industry, looking for a place to start, or are a seasoned professional looking to sharpen particular skills, SANS Stay Sharp training can help you achieve your goal.

View the line-up of courses on the next page and register now to get targeted training designed to help you build specialized skills you can start using the same week you take the training.

SANS Stay Sharp Spring 2022 – Live Online Features

- Bite-sized Live Online SANS training: Build real-world, practical cybersecurity skills quickly
- Less time away from work and home responsibilities
- Apply new skills the same week you take training
- Courses taught by real-world practitioners with proven expertise in the field
- Real-time support from GIAC-certified TAs
- Archive of course lectures uploaded to your account daily during the event
- Four months of access to your course lectures so you can revisit the recordings

Save $300 off select courses when you register and pay by March 16, 2022.

“This training supercharges my skills that I need for my position. Rather than spending three months learning on the job, I can take a SANS course and be ready to jump into the work.”
—Bryan Gold, Federal Reserve System

“Excellent two-day course provided numerous examples of risk management theory and practice, and documents to give you as many opportunities as possible to grow your knowledge base.”
—Jeff Imsdahl, Xcel Energy

Enhance your training experience. Add a GIAC Certification attempt and OnDemand Bundle to your course.

Distinguish yourself as an information security leader and get certified with GIAC Certifications. giac.org

Extend your training experience with an OnDemand Bundle. Receive four months of supplemental online review and 24/7 online access to your course lectures, materials, quizzes, and labs. sans.org/ondemand/bundles
