SANS

The most trusted source for cybersecurity training, certifications, degrees, and research

A Partnership for State, Provincial, Local, Tribal, and Territorial Government

The SANS Institute SLTT Aggregate Buy Program

Improving Your Security Posture

Cyberthreats appear as fast as a mouse click in today's environment. Your best defense is an educated workforce. Eligible organizations use this Partnership Program to allocate technical cybersecurity and security awareness training to their employees, taking advantage of highly discounted rates on superior training to protect national security.

Special Offer:

For a limited time, save 50% when you purchase SANS technical and security awareness training through our partnership purchase window. Special discounts are available:

- **Winter Program:**
  December 1–January 31

- **Summer Program:**
  June 1–July 31

Make a positive impact on your cybersecurity protection. Get the training you need at an affordable cost.

A Smart Approach to Security Awareness and Training

www.sans.org/partnerships/sltt

The SLTT Government partnership program draws on SANS Institute's mission to ensure InfoSec practitioners in critical organizations have the skills needed to protect networks, critical infrastructure, sensitive data, and enhance the cybersecurity readiness and response of state, provincial, local, tribal, and territorial government entities. This program offers both security awareness and online technical training courses to qualifying organizations at substantial cost savings.

SANS ONLINE TRAINING

SANS Online Technical Training offers the same content, instructors, and results as our live courses with the flexibility to learn in an online environment, allowing information security professionals to train whenever and wherever it's most convenient. Online courses feature hands-on labs and access to subject-matter experts to guide students through challenging concepts or questions. Save 50% when you purchase training credits during one of our partnership purchase windows. Online training credits may be redeemed for any course offered in our two most popular training formats: self-paced e-learning via OnDemand and livestream, interactive scheduled sessions via Live Online. Security professionals have their choice from more than 50 courses and certifications in disciplines that include:

- Blue Team Operations
- Cloud Security
- Cyber Defense Essentials
- Digital Forensics & Incident Response
- Industrial Control Systems
- Penetration Testing & Ethical Hacking
- Purple Team
- Security Leadership, Legal, and Audit

CYBER RANGE SANS SKILLS QUEST BY NETWARS

SANS' self-paced cyber ranges are subscriptions with 24/7 access for a period of six months, covering a wide range of cybersecurity topics designed with challenges and hints that support continuous knowledge and skill development, helping participants master the latest skills and technologies in the industry. It provides convenient access for those needing flexibility to practice their cyber skills at their own pace, supporting in-depth learning, practice, and assessment.

Students explore topics thoroughly in a pressure-free environment, fostering critical thinking and problem-solving skills. This platform offers hands-on challenges with helpful hints when you're stuck, promoting continuous skill development. Such an approach promotes a robust understanding that goes beyond superficial knowledge, invaluable for developing expertise and effectively applying knowledge in diverse scenarios. It also serves as an effective modality for organizations aiming to evaluate, sustain, and enhance the skills of their information security workforce.

SANS SECURITY AWARENESS

Security Awareness training is a critical component of a comprehensive security program. Compliance and behavior change becomes difficult for non-technical individuals without the proper content. SANS Security Awareness offers a comprehensive solution for end users and individuals of all levels with expert-authored content. Created by a trusted global network of cyber security professionals, this Partnership Program includes several key Security Awareness products:

- **EndUser** - Comprehensive security awareness training for all computer users based on the Critical Security Controls
- **Phishing** – Test your employees through phishing simulations consistent with real world threats and attacks
- **Business Leaders and Managers** - Leadership-focused cybersecurity training to secure business processes
- **Developer** –Train your developers in secure coding techniques and how to recognize current threat vectors in applications
- **ICS Engineer** –Rigorous computer-based training for those interacting with or operating Industrial Control Systems
- **IT Administrator** –Ensure staff with privileged access understand security concepts to protect your organization
- **Role-Based PCI-DSS 4** -Equip staff to understand and safeguard cardholder data per the 2024 PCI 4 standards
- **Workforce Risk Mgt for AI** -Equip your staff with the essential knowledge and skills to navigate the complex AI landscape
- **NERC/CIP** – Relevant training addresses NERC CIP Reliability standards for the utility industry
