

The most trusted source for cybersecurity training, certifications, degrees, and research

SANS SLTT Government Partnership

Aggregate Buy Program | www.sans.org/partnerships/sltd

The SLTT Government partnership program draws on SANS Institute’s mission to ensure InfoSec practitioners in critical organizations have the skills needed to protect networks, critical infrastructure, sensitive data, and enhance the cybersecurity readiness and response of state, provincial, local, tribal, and territorial government entities.

Through the SANS SLTT Government Partnership aggregate buy program, you can get the training you need at an affordable cost and improve your organization’s security posture against ransomware, phishing, and other cyber-attacks. The secret to this successful program is cost reduction realized by “aggregate” economies of scale.

This program offers both security awareness and online technical training courses to qualifying organizations at substantial cost savings, during special purchase windows.

SANS products, training and services, including GIAC certification, cannot be resold without explicit and written approval from an official at SANS Institute.

Security Awareness training is a critical component of a comprehensive security program. Compliance and behavior change becomes difficult for non-technical individuals without the proper content. SANS Security Awareness offers a comprehensive solution for end users and individuals of all levels with expert-authored content. Created by a trusted global network of cyber security professionals, this Partnership Program includes several key Security Awareness products:

- **End User** – Comprehensive security awareness training for all computer users based on the Critical Security Controls
- **Phishing** – Test your employees through phishing simulations consistent with real world threats and attacks
- **Business Leaders and Managers** - Leadership-focused cybersecurity training to secure business processes
- **Developer** –Train your developers in secure coding techniques and how to recognize current threat vectors in web applications
- **ICS Engineer** –Rigorous computer-based training for those interacting with or operating Industrial Control Systems
- **IT Administrator** –Ensure staff with privileged access understand security concepts to protect your organization
- **Role-Based PCI-DSS 4** -Equip staff to understand and safeguard cardholder data per the 2024 PCI 4 standards
- **Workforce Risk Mgt for AI** -Equip your staff with the essential knowledge and skills to navigate the complex AI landscape
- **NERC/CIP** – Relevant training addresses NERC CIP Reliability standards for the utility industry

Awareness Training

Product License	End User	Phishing	End User & Phishing Bundle
1-Year Price	\$3,420	\$4,260	\$6,660
# of Users Included	1,200	1,200	1,200
Each Additional User	\$2.85	\$3.55	\$5.55
2-Year Price	\$6,300	\$7,920	\$12,180
# of Users Included	1,200	1,200	1,200
Each Additional User	\$5.25	\$6.60	\$10.15

Specialized Training

Product License	Annual Price	# of Users Included	Each Additional User
Business Leaders and Managers	\$3,175	50	\$63.50
Developer	\$2,890	10	\$289.00
ICS Engineer	\$3,175	50	\$63.50
IT Administrator	\$3,175	50	\$63.50
Role Based PCI-DSS 4	\$3,500	250	\$14.00
Workforce Risk Mgt for AI	\$3,000	150	\$20.00
NERC / CIP	\$3,175	50	\$63.50

*Service level and hosting options are available at an additional cost.

“I love your product. I implemented SANS Security Awareness at California Air Resources Board back in October 2012. I really enjoyed the program; I had 92% compliance with 1300 staff. Your product was an obvious choice for our organization here at Covered California.”

—Terese Matchim, ISO for California Health Benefit Exchange

SANS technical courses deliver and validate hands on cybersecurity skills. Learn from real-world experts and gain immediately applicable skills. Students choose from SANS' two available online training formats offering flexible and effective options for information security professionals of all experience levels. Complete SANS training from anywhere in the world in your preferred online format.

■ **OnDemand**

SANS OnDemand courses provide the flexibility to train online wherever and whenever it's most convenient for you. With four months of access to the online course materials, including lectures, quizzes, and labs, you can master the course content on your schedule, at your own pace.

■ **Live Online**

SANS Live Online features livestreamed, interactive training with SANS' top instructors you can take from anywhere. Students can choose scheduled sessions offered across multiple global time zones from our full catalog of courses. Hands-on lab exercises and the ability to engage with your instructors and peers elevate the learning experience.

Which Online Training Method Is Best for You?

This comparison chart will help you decide.

	OnDemand	Live Online
Taught by an unparalleled faculty of information security leaders		
All required supporting materials, media, and exercises		
Flexible, self-paced training platform with four months of access		
Live online instructor-led training available across multiple global time zones		
Integrated quizzes to reinforce learning		
GIAC-certified subject-matter-expert support via live chat and email		
Real-time access to instructors		
Hands-on virtual labs to help prepare you for your GIAC exam	4 months	During the course
Archived live course recordings		4 months
No travel costs		
Minimal impact to your normal routine		
Flexible and effective SANS training from your own computer		
GIAC certifications available for more than 35 courses		
Extend your lab access and get SME support for four months with optional OnDemand Bundle		

Pricing

Long Course: \$4,225

GIAC: \$839

Minimum order size per transaction: Three long courses

View SANS Training Roadmap: www.sans.org/cyber-security-skills-roadmap/

GIAC develops and administers premier, professional information security certifications. More than 35 practitioner cybersecurity certifications align with SANS training and ensure mastery in critical, specialized InfoSec domains. GIAC Certifications provide the highest and most rigorous assurance of cybersecurity knowledge and skill available to industry, government, and military clients across the world.

A GIAC Certification ensures mastery of real-world knowledge and skills.

- Tests on pragmatics rather than theory
- Certifications are valid for four years
- A renewal process that keeps you up to date on the latest industry trends
- Advanced certification options: Publishing a Gold Paper through GIAC and/or obtaining the GIAC Security Expert Certification

Top Four Reasons to Get GIAC Certified:

- 1. Promotes hands-on technical skills and improves knowledge retention**
- 2. Provides credible proof of technical know-how**
- 3. Creates opportunity for promotion and respect from peers**
- 4. Demonstrates technical qualifications to hiring managers for career growth**

What is NetWars Continuous?

SANS NetWars Continuous Online Range uses the gamification of IT security to advance your most vital InfoSec skills. To build your skills and keep them from getting rusty, you need an environment where you can apply your knowledge to solving real-world InfoSec issues to stay sharp. That's what NetWars Continuous is all about. Over the course of four months, you can master real-world tactics and techniques in a safe learning environment.

NetWars Continuous – Always Available

- It allows participants an opportunity to advance their hands-on technical skills. Players learn the areas where they need to increase their proficiency so they may improve, come back, and continue the challenge.
- It gives participants four months of access to NetWars Continuous. At the end of the four months, participants will receive a written assessment of the skills which they demonstrated during NetWars.
- Participants may choose from one of two NetWars Continuous Versions: **Core NetWars Continuous** or **DFIR NetWars Continuous** to experiment with real-world scenarios and develop hands-on skills.

Core NetWars Continuous Topics

- PowerShell challenges
- Network traffic capture and analysis
- Penetration testing
- Common management system vulnerability exploitation
- Threat detection through log analysis
- Windows and Linux privilege escalation
- Cryptographic security and exploitation
- Advanced malware analysis
- Intrusion detection
- Linux fundamentals
- Windows exploitation
- Command Line Kung Fu
- Advanced database hacking
- Reverse engineering and debugging
- Binary exploitation
- Firewall fundamentals
- Fuzzing
- Social engineering
- WAF evasion
- Scanning/enumeration

DFIR NetWars Continuous Topics

- Digital forensics
- Incident response
- Threat hunting
- Malware analysis
- Endpoint forensics
- Network forensics
- Memory analysis

Pricing

\$2,600 per user for a four-month period.
