# SANS 2022 CLOUDSECNEXT SUMMIT

San Diego, CA  |  In-Person and Virtual

May 3: **Expo Day 1 & Summit Bonus Sessions**
May 4: **Expo Day 2 & Summit Solutions Track**

## OVERVIEW

It's likely that your organization stores sensitive data and resources in the cloud.  Protecting these assets is top of mind for executives and security professionals. The speed and simplicity of the cloud allow companies to build applications faster than ever before. Unfortunately, this speed often comes with a cost - a lack of focus on security.

Security in the cloud shouldn't slow down the business. Companies must move fast to keep up with their competition, and security professionals must develop automated solutions to stay ahead of threats. Attackers are finding new ways to exploit weaknesses in the cloud, which requires companies to implement innovative solutions to protect their customers' data.

The CloudSecNext Solutions Track will focus on technical case studies and thought leadership using specific examples relevant to helping companies improve the security of their cloud environment through automation.

## CHAIRPERSON

**AJ Yawn**
**Cloud Security Expert**

AJ Yawn is Co-Founder and CEO at ByteChek and a Founding Board Member of the National Association of Black Compliance and Risk Management Professionals (NABCRMP). AJ has earned 6 AWS certifications including the AWS Solutions Architect-Professional and AWS Security-Specialty. Prior to ByteChek, AJ spent over a decade in the cybersecurity industry both in the US Army and as a consultant. He is a regular speaker at SANS Cloud Security curriculum events such as BIPOC in Cloud Forum and CloudSecNext Summit, and can be found teaching SEC557
