SURVEY OVERVIEW:

**SANS 2024 Multicloud Survey:**
Securing Multiple Clouds Amid Constant Changes

Cloud services rapidly evolve as the result of incessant agile software delivery, but so are cloud customers. Previous SANS surveys have identified mergers and acquisitions as a major reason that cloud customers have started using a new cloud service provider and use multiple single sign-on solutions. Leadership changes can create a lack of consistency. Lack of architectural guidance may also leave different teams within a company going off in different directions.

This survey will explore the underlying forces behind why multicloud customers make the cloud adoption decisions that have been identified in past surveys.

Topics to be explored include:

• Identify the reasons behind why certain cloud technologies or best practices are only partially adopted
• Assess the influence of a cloud architecture strategy on the choices made during implementation
• Examine how widely used and effective various third-party and cloud-native security tools, technologies, and services are
