Intensity ratio: tCO <sub>2</sub> e (gross Scope 1 + 2) / FTE	0.89	1.16
Emissions out of Scope: tCO <sub>2</sub>	-	-

## Methodology

As an LLP incorporated in the UK, Simmons & Simmons is required to report its energy use and carbon emissions in accordance with the Companies (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018. The data detailed in this table represent emissions and energy use for which Simmons & Simmons is responsible, including energy used in offices and fuel used in company owned or operated vehicles or for company business. We have used the main requirements of the Greenhouse Gas Protocol Corporate Standard to calculate our emissions, along with the UK Government GHG Conversion Factors for Company Reporting 2024.

Like last year, all of Bristol, Cambridge and London sites use renewable electricity.

## Energy Efficiency Actions

In order to increase energy efficiency in the Simmons & Simmons, London office lighting timer settings were reduction to 20 minutes and LED lighting was installed in selected client areas.
