International information and data sharing

Scrutiny of profit allocation

Enhanced revenue authority powers and intervention

# Our practice

## Helping you navigate complex tax risk and disputes

### Reputation for excellence

We have one of the strongest contentious tax practices in the market, specialising in complex, high-value tax disputes. We are proud of our reputation for exceptional legal service and are committed to getting results for our clients in their most complex matters.

### Integrated, multi-disciplinary team.

We bring together a truly integrated and collaborative team across our wider Litigation, Investigations, Competition and Regulatory practices across different jurisdictions to provide solutions to your most complex problems.

### Global reach, sector expertise

We work across our international offices as one team to provide innovative solutions in four heavily-regulated sectors: finance, asset management, healthcare and life sciences, and TMT. Clients value our high quality, specialist and pragmatic advice, always tailored to their specific circumstances and objectives.

### Strategic solutions to complex tax disputes.

We combine outstanding technical ability, business insight, and innovation into a single tax-led proposition that brings together lawyers, tax advisers, accountants, transfer pricing specialists, economists and data scientists.

### Approaching every matter as your business partner.

We work with you, not for you. With a keen understanding of your business objectives, time sensitivities and reputational concerns, our advice is delivered in clear, commercial terms for your Board and key stakeholders.

### More than just litigators

We are conflict free and one of very few law firms to have a truly dedicated contentious tax practice, with dual-qualified partners and associates entirely focused on tax litigation and disputes.

We specialise in commercial tax litigation, e-discovery, regulatory investigations involving HMRC or international tax authorities, dawn raids, professional negligence and fraud work.

The depth of our skillset means that we adopt the right dispute resolution strategy for the matter at hand, whether litigation, ADR or negotiation with tax authorities.

### Transfer pricing expertise

We have the capabilities to assist with the most complex transfer pricing issues. Our specialist transfer pricing team consists of tax lawyers, accountants, transfer pricing experts and economists and advises clients across the entire transfer pricing lifecycle, with dispute management always front of mind.

### Leading the way in innovation.

With a track record for innovative solutions and a reputation for thinking outside the box, we deliver value to clients by utilising pioneering legal technology, robust investigation techniques and new ways of working.

We were one of the first law firms to acquire a legal engineering business to provide new services and solutions for clients, blending legal, data, design and engineering skills.
