navigator: product tax

Smarter decision-making

navigator: product tax provides key information for individual investors on the domestic taxation of investment returns through five common fund types.

The service covers the following 10 jurisdictions: France, Germany, Italy, Japan, Luxembourg, the Netherlands, Spain, Switzerland, the UK and the US.

Real-time access

By making tax information instantly accessible on demand, the service enables business, tax and compliance teams to proactively assess tax risk before making investment decisions or advising potential investors.

The service is designed to provide clear, practical and up-to-date tax information that is available 24/7 from anywhere in the world.

Current and forward looking

navigator: product tax is updated every six months for changes in tax law and tax authority practice across all 10 jurisdictions.

It also scans the horizon for prospective changes that subscribers may need to be aware of. Updates on any material changes will be communicated to subscribers through the service.

Cost-effective

navigator: product tax offers a cost-effective source of cross-border tax information for asset and wealth managers. The pricing consists of an initial subscription fee together with an annual updating fee. We are happy also to discuss combining access to the service with a retainer arrangement, to gain access to our cross-jurisdiction subject matter experts.

Subscribe to navigator: product tax

Contact one of our team members below to subscribe. Subscription is straightforward and provides access to the service for all of your team.
