

THE  
WEREWOLF  
EXPERIMENT

Dr. Cynthia Graw's Secret stuff.

Keep out.

Well... I guess you can read the rules on the back of this page.

## RULES

- 1) You will need a timer device and extra pencils. Note: looking at your phone, computer, encyclopedia, etc. for anything other than the time is CHEATING.
- 2) Set your portable brain irradiator (phone) timer for ONE HOUR. You will start the timer after reading the next note.
- 3) Don't eat anything in the game. This should be obvious, but I work with a bunch of animals.
- 4) Brains, not Brawn! You do not need to cut, tear, punch, bite, claw or generally destroy anything to complete your goal.
- 5) If you pick the locks, use brute force or do anything other than solve the puzzles to open the locks, then the antidote won't work. That's automatic werewolf territory and there are not enough razors in the world to keep that body hair at bay.

## TIPS FOR SUCCESS

- 1) Elect a leader to oversee everything, fill in the answer sheet (A1, etc.) and make sure all puzzles are being worked on.
- 2) This is a cooperative game, but for the sake of time, divide and conquer! If you get stuck, switch puzzles.
- 3) Look everywhere and use everything. Just because you've used something, it doesn't mean you're done with it.
- 4) There are no intentional red herrings.
- 5) If you're reeeaaaallllly smart you can win this game in 14 minutes.

Open this when you are ready  
to start the game.

SERIOUSLY  
STOP!

SERIOUSLY  
STOP!

Open this when you are ready  
to start the game.

I warned you to keep out. Now you've released a  
**POISONOUS VAPOR** and have only **ONE HOUR**  
to open the **ANTIDOTE JAR** or you will turn into a **WEREWOLF**.

So here's the deal: I was trying to make a super human.  
Instead, I turned myself into a werewolf. Whoopsie! But,  
I'm crazy smart and made an antidote!

All good science experiments must be reproducible, but  
experimentation on humans is kind of a no-no. Hence this Pandora's  
Box – which you opened! How's that for reverse psychology?  
Now, you have to repeat my experiment.

I've given you everything you need to open the **ANTIDOTE JAR**,  
but I haven't made it easy.

Good Luck!  
Just kidding.  
I want a werewolf army.  
**MWAHAHAHA**

**START YOUR TIMER NOW!**

## HYPOTHESIS

If we splice together the most awesome attributes of a wolf's DNA with the human genome, then we will Ps Mother Nature's handbook to creating a SUPER HUMAN SPECIES!

## MATERIALS

Lots of Ps.

## PROCEDURE

1. ~~Extract specimen from wolf.~~
2. Knock wolf out.
3. Extract specimen from wolf.
4. Ps cage, so she's comfy-cozy when she wakes up.
5. Centrifuge away! Isolate DNA sequences that code for awesomeness.
6. Extract DNA from human subject (self). Everyone says not to experiment on yourself, but, what's the worst that could happen?
7. Splicety-splice wolf specimen with human DNA.
8. Vaporize new SUPER HUMAN formula, for easy snorting.
9. TEST ON SELF. If it goes well, test on family. (What? Everyone Ps.)

## RESULTS

## WORD LIST

### THINGS YOU'D FIND IN A LABORATORY

Cork	Glasses	Rubber Gloves	Ruler	Tears	Steam
Sink	Slides	Thermometer	Tongs	Tube	Torch
Stir	Scientist	Microscope	Mask	Scales	

HINT: All words touch at least one other word.

P2 Puzzle - Back

## ACROSS

3. The outer edge
7. Feline nemesis
8. Lab containers
11. The boxes in your escape room package are \_\_\_\_\_
13. Not new
16. Saw's partner on the playground
17. Neruda, Frost, and Cummings
19. Wolf like
20. What's left behind after injuries.

## DOWN

1. Wolf nail
2. Conditionally releases from prison
3. Wolf kiss
4. Not out
5. A name I call myself.
6. Rip
9. Heart, Diamond, Club...
10. Beware this in March
12. Several female deer
13. Not down
14. Spanish yes
15. Typist's measurement
17. Ma's partner
18. Either

## ~~FIXING MY MISTAKE~~

*Brave*

### HYPOTHESIS 1

*Further scientific inquiry*

If a scientist were ~~stupid~~ enough to ignore the advice of every horror and sci-fi movie ever and experiment on herself, then she would need to create an antidote.

### HYPOTHESIS 2

If I want to eradicate the BIG BAD WOLF aspects from the poor little human DNA then I need to create an antidote based on specimens from even more

*As* \_\_\_\_\_ creatures.

### PROCEDURE

1. Steal specimens from neighboring labs:  
Lion, *As* \_\_\_\_\_, Unicorn, Aliens.
2. Extract attributes from specimens that will defeat the werewolf aspect: A mighty *As* \_\_\_\_\_, serious aggression, a bit of magic, superior technologic know-how.
3. Extract DNA from werewolf subject (self). I know, I know, but I am literally the only possible subject this time.
4. Splice-O-Rama: Creature specimens and my ruined DNA.
5. Infuse paper with antidote for repeat usage.
6. Rub the *As* \_\_\_\_\_ paper and let that sweet, sweet antidote permeate my paws before the full moon.
7. See if this antidote is worth its *As* \_\_\_\_\_.

### RESULTS

DEATH.

Just Kidding! It works.  
IF YOU CAN FIND IT IN TIME....

A2

A2 Answer Sheet - Back

Step 1: Complete the picture.  
 Step 2: Have you discovered the way to read  
 in ultraviolet?  
 Step 3: Use Step 2 to find Step 3: "▲★■◆"  
 Step 4: Use Step 1 Picture with Step 3  
 Instructions to get P3 Answer.
