SUBJECT XPEL Emblem Alignment Tool for Tesla

APPLIES TO XPEL Dealers

DESCRIPTION

XPEL is happy to launch a new alignment tool for Tesla Models "3" and "Y." This is a tool to help you align your Tesla "T" logo/emblem on your hood/rear. This tool is invaluable for paint protection film installers and several automotive shops. This tool is designed to sit flush against the edge of the hood/trunk. This ensures the emblem will be perfectly vertical/perpendicular to the edge of the hood/trunk. The tool is 3D printed using TPU plastic to ensure durability for its high resistance to impact and heat.

Please see the available models below and visit the [Tools page](#) on our website to learn more.
