APPLIES TO	XPEL Dealers

DESCRIPTION

Introducing the XPEL EZ-PRESSURE (R1053), the latest innovation from the makers of EZ-Tint and EZ-Mini, crafted specifically for professional tinters. This new multi-functional tool is essential for anyone installing XPEL Vision security film or other vision films. Its standout feature is an ergonomic handle designed to maximize comfort, paired with an adjustable arm band that ensures the tool becomes a natural extension of your arm.

The EZ-PRESSURE is more than just a squeegee; it's a comprehensive solution that includes a razor blade holder, perfect for efficiently scraping off old film and adhesive residues. The design is focused on reducing the physical effort required during film installation, particularly in challenging scenarios where applying consistent pressure is tough.

With the XPEL EZ-PRESSURE, you're equipped for the demanding conditions of fieldwork. It boasts an interchangeable blade holder that easily switches between an application squeegee and a scraper. Whether you're applying new film or removing the old, the EZ-PRESSURE is the all-in-one tool that promises to make your job easier, faster, and more comfortable. Get ready to experience the next level of window film installation with XPEL EZ-PRESSURE.
