SUBJECT XPEL PPF Product Packaging Update

APPLIES TO XPEL PPF - All XPEL Dealers

DESCRIPTION

We are pleased to introduce an update to our product packaging: a transition to a staple-less box design for all XPEL Paint Protection Film products.

This upgraded design ensures superior protection for our film during transit by reducing movement within the box, eliminating potential damage. Furthermore, the box ends have been strengthened, enhancing their durability by more than twice compared to the previous design.

But the improvements aren't just about product safety. We've also considered your needs, making these boxes easier to flatten once the roll of film has been utilized. This facilitates more efficient disposal, promoting tidiness in your workspace.
