# Governed Portfolio - Cautious Growth

Factsheet 30/06/2025

## Investment Objective

The Portfolio aims to provide some capital growth whilst focusing on capital preservation over the short to medium term. The portfolio is managed with the aim of remaining within a fee cap (comprising the ongoing charge figure of the underlying funds and the portfolio-management fee) of 50 basis points. The portfolio is actively managed and primarily invests in equities and fixed-income assets, with a notable bias towards more-defensive assets. The portfolio primarily invests in passive funds, but it will also have exposure to active funds if the managers believe value can be added within the portfolio's fee constraints. Positions in alternative asset classes may be included for diversification purposes. We set a maximum equity weighting of 30% for this risk profile.

## Returns Disclosure

The trailing returns shown are cumulative and year-on-year returns show complete 12-month periods. All performance is shown net of the holdings' management fees, however do not include the fees charged by Morningstar Investment Management Europe Ltd, or Aviva or the financial adviser. The actual performance experienced will therefore be lower once these charges have been taken into account. The returns are calculated through Morningstar Direct, are provided for illustrative purposes only and should not be viewed as the performance of an actual account. Past performance is not a guide to future returns.

A fund may not be available on all platforms and hence it is not always possible for us to replicate the model portfolios through all platforms. In this case, different funds will be used and weightings may also differ for portfolio construction reasons.

## Risk Warnings

Unless stated otherwise, all data and information is presented at 30/06/2025. Past performance is not a guide to future returns. The value of investments may go down as well as up and investors may not get back the amount invested. The portfolio shown has similar investment objectives and strategies as the portfolio recommended to individual clients by their financial adviser; however, may not contain the same securities that are currently underlying the portfolio provided to individual clients. Specific securities mentioned should not be viewed as a recommendation to buy or sell such securities. Due to platform requirements, cash allocations may differ per platform.

There is no guarantee that a diversified portfolio will enhance overall returns or will outperform a non-diversified portfolio. Neither diversification nor asset allocation ensure a profit or guarantee against loss. It is the responsibility of the adviser to assess the suitability of an investor and select the correct model, appropriate to the investor's objectives and needs. Morningstar Managed Portfolios are not suitable for clients who cannot bear any capital loss. It is important to note that investments in mutual funds involve risk, including as a result of market and general economic conditions, and will not always be profitable.

## Morningstar Equity Style Box\*

The Morningstar Style Box is a nine-square grid that illustrates the investment style of a security. Size (large, mid, or small) is displayed along the vertical axis and style is displayed along the horizontal axis. The "value" and "growth" investment styles are common to both stocks and funds. For stocks, the central column of the Style Box represents the "core" style. Few or no funds contain only stocks with extreme value-growth orientations, and both value and growth managers often hold core stocks for diversification or other reasons. Therefore, for funds, the central column represents the "blend" style (a mixture of growth and value stocks or mostly core stocks).

# Governed Portfolio - Moderately Adventurous Growth

Factsheet 30/06/2025

## Investment Objective

The Portfolio aims to provide capital growth over the long term. The portfolio is managed with the aim of remaining within a fee cap (comprising the ongoing charge figure of the underlying funds as well as the annual management charge) of 50 basis points. The portfolio is actively managed and primarily invests in equities and fixed income assets, with a bias to equities. The portfolio primarily invests in passive funds, but it will also have exposure to active funds if the managers believe value can be added within the portfolio's fee constraints. Positions in alternative asset classes may be included for diversification purposes. We set a maximum equity weighting of 90% for this risk profile.

The trailing returns shown are cumulative and year-on-year returns show complete 12-month periods. All performance is shown net of the holdings' management fees, however do not include the fees charged by Morningstar Investment Management Europe Ltd, or Aviva or the financial adviser. The actual performance experienced will therefore be lower once these charges have been taken into account. The returns are calculated through Morningstar Direct, are provided for illustrative purposes only and should not be viewed as the performance of an actual account. Past performance is not a guide to future returns.

A fund may not be available on all platforms and hence it is not always possible for us to replicate the model portfolios through all platforms. In this case, different funds will be used and weightings may also differ for portfolio construction reasons.

## Risk Warnings

Unless stated otherwise, all data and information is presented at 30/06/2025. Past performance is not a guide to future returns. The value of investments may go down as well as up and investors may not get back the amount invested. The portfolio shown has similar investment objectives and strategies as the portfolio recommended to individual clients by their financial adviser; however, may not contain the same securities that are currently underlying the portfolio provided to individual clients. Specific securities mentioned should not be viewed as a recommendation to buy or sell such securities. Due to platform requirements, cash allocations may differ per platform.

There is no guarantee that a diversified portfolio will enhance overall returns or will outperform a non-diversified portfolio. Neither diversification nor asset allocation ensure a profit or guarantee against loss. It is the responsibility of the adviser to assess the suitability of an investor and select the correct model, appropriate to the investor's objectives and needs. Morningstar Managed Portfolios are not suitable for clients who cannot bear any capital loss. It is important to note that investments in mutual funds involve risk, including as a result of market and general economic conditions, and will not always be profitable.

## Morningstar Equity Style Box\*

The Morningstar Style Box is a nine-square grid that illustrates the investment style of a security. Size (large, mid, or small) is displayed along the vertical axis and style is displayed along the horizontal axis. The "value" and "growth" investment styles are common to both stocks and funds. For stocks, the central column of the Style Box represents the "core" style. Few or no funds contain only stocks with extreme value-growth orientations, and both value and growth managers often hold core stocks for diversification or other reasons. Therefore, for funds, the central column represents the "blend" style (a mixture of growth and value stocks or mostly core stocks).

# Governed Portfolio - Adventurous Growth

Factsheet 30/06/2025

## Investment Objective

The Portfolio aims to provide capital growth over the long term. The portfolio is managed with the aim of remaining within a fee cap (comprising the ongoing charge figure of the underlying funds and the annual management charge) of 50 basis points. The portfolio is actively managed and invests predominantly in equities to a maximum of 100%. The portfolio primarily invests in passive funds, but it will also have exposure to active funds if the managers believe value can be added within the portfolio's fee constraints. Positions in fixed income, property and alternative asset classes may also be included.

# Governed Portfolio - Moderately Cautious Income

Factsheet 30/06/2025

## Investment Objective

The Portfolio aims to provide a sustainable income that can grow over time. The portfolio is managed with the aim of remaining within a fee cap (comprising the ongoing charge figure of the underlying funds and the annual management charge) of 60 basis points. The portfolio also aims to provide capital growth over the medium term. The portfolio is actively managed primarily investing in passive funds within the core asset classes of equity, fixed income and property. The portfolio may also have exposure to active funds if the managers believe value can be added within the fee constraints. Smaller positions in alternative asset classes may be included for diversification purposes. We set a maximum equity weighting of 50% for this risk profile.

## Portfolio Details

Minimum Investment	Platform Dependent
Inception/Launch date	31 March 2017
Investment Manager	Morningstar Investment Management Europe Ltd
Annual Management Charge	0.15%
Yield	4.70%*

\*Based on the weighted historical 12 month yield of the selected funds assuming a static asset allocation. This figure may include estimated yields for funds launched less than 12 months ago so is provided for illustrative purposes only and subject to change.
