Why invest in the portfolio?

More money in your pocket— Morningstar Investment Management's and the underlying fund costs are limited to 0.50%..

Flexible and adaptable—uses active and passive investment vehicles where we have the highest conviction.

Oversight— adheres to a strong governance framework, with both Morningstar Investment Management and Aviva providing oversight.

Built for growth—long-term investment solution designed to maximise reward for risk.

How is the portfolio managed?

Morningstar Investment Management invests your money with the following in mind:

Value

The potential for return is greater and loss is lower if you purchase investments that are currently overlooked or underappreciated by other investors...

Capital Preservation

Our goal is to not invest in assets if the reward isn't worth the risk. In other words, we're happy to hold higher than normal levels of cash instead of investing in overvalued assets.

Quality and Cost Conscious

...but it's not just about value. We focus on buying quality investments at attractive prices. We do this by undertaking comprehensive research to understand the fundamental drivers behind each opportunity.

True Diversification

You're less exposed to the risks of investing when your money is spread across a mix of different underlying investments (like shares, property, bonds and cash) that complement each other. In other words, simply holding more of the same/similar thing isn't the same as true diversification.

What are you invested in?

You will be invested primarily in passive funds but will also have exposure to active funds if we see the potential for added value within the fee structure.

The portfolio invests across a range of underlying asset classes—such as equities, fixed interest, and cash—when and where it makes sense to do so.
