**Risk Warnings**

Past performance is not a guide to future returns. The value of investments may go down as well as up and investors may not get back the amount invested. Specific securities mentioned should not be viewed as a recommendation to buy or sell such securities. There is no guarantee that a diversified fund will enhance overall returns or will outperform a non-diversified fund. Neither diversification nor asset allocation ensure a profit or guarantee against loss. It is important to note that investments in mutual funds involve risk, including as a result of market and general economic conditions, and will not always be profitable.

**Morningstar Equity Style Box (Look Through)\***

The Morningstar Style Box is a nine-square grid that illustrates the investment style of a security. Size (large, mid, or small) is displayed along the vertical axis and style is displayed along the horizontal axis. The "value" and "growth" investment styles are common to both stocks and funds. For stocks, the central column of the Style Box represents the "core" style. Few or no funds contain only stocks with extreme value-growth orientations, and both value and growth managers often hold core stocks for diversification or other reasons. Therefore, for funds, the central column represents the "blend" style (a mixture of growth and value stocks or mostly core stocks).
