

Johnson & Johnson

ACUVUE® OASYS 2-Week 24P Packaging Update

(Sphere Only)

Starting March 2025, you may notice the following changes to the packaging configuration for the 24-pack of ACUVUE® OASYS 2-Week (Sphere only).

- The 4 internal cartons were removed
- The blisters will be separated for convenience and have individual dividers to keep them secure
- The new carton is smaller in overall size

This new paper carton configuration contains 55%* less paper than our current configuration. The packaging graphics will remain the same, and there will be no changes made to the packaging materials, packing solution, or contact lenses. Our manufacturing facilities have not changed locations and remain located in Jacksonville, Florida and Limerick, Ireland.

As we transition to this new packaging, it is likely you will see new and old packaging in the market at the same time.

If you would like to obtain more information on the new packaging updates, please contact Johnson & Johnson Customer Service via email at vpweb@visus.jnj.com.

Please find below images representing the packaging updates.

New Packaging Structure. Same Great Lenses!

BEFORE	AFTER (NEW)	NOTES
		<ol style="list-style-type: none"> 1) The changes are only for Sphere variants 2) Branding graphics will remain unchanged 3) No internal individual cartons 4) The blisters will be separated for convenience. 5) Branding graphics of the foil remain unchanged

* Based on paper weight

Important Information for Contact Lens Wearers: ACUVUE® Contact Lenses are available by prescription only for vision correction. An eye care professional will determine whether contact lenses are right for you. Although rare, serious eye problems can develop while wearing contact lenses. To help avoid these problems, follow the wear and replacement schedule and the lens care instructions provided by your eye doctor. Do not wear contact lenses if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, remove the lens and contact your eye doctor immediately. For more information on proper wear, care and safety, talk to your eye care professional and ask for a Patient Instruction Guide, call 1-800-843-2020, or download the [Patient Instruction Guide](#).

† Helps protect against transmission of harmful UV radiation to the cornea & into the eye.

^ **WARNING:** UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV-absorbing goggles or sunglasses because they do not completely cover the eye and surrounding area. You should continue to use UV-absorbing eyewear as directed. **NOTE:** Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a number of factors such as environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV-blocking contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV-blocking contact lenses reduces the risk of developing cataracts or other eye disorders. Consult your eye care practitioner for more information.
