

About UnifyApps

UnifyApps is the AI Agent and App Builder Platform for the enterprise, delivering an AI Operating System for AI-Native operations. It makes data AI-ready, builds the enterprise knowledge graph, and unifies systems of record, knowledge, and action—turning GenAI pilots into governed, scalable production systems with observability, control, and measurable ROI.

With thousands of pre-built integrations and an LLM-agnostic design, UnifyApps helps enterprises operationalize AI securely and confidently. Founded in 2023 and backed by WestBridge Capital, ICONIQ, and Elevation Capital, UnifyApps is headquartered in New York with a presence across the Americas, EMEA, and India.
